PROFESSIONAL SUMMARY

Software Engineering student at African Leadership University with practical experience spanning software development, entrepreneurship, food production, sales, digital marketing, customer service, and business operations. Experienced in Python, Dart, JavaScript, Bash, Flutter, REST APIs, Git, and Linux environments, with additional hands-on experience running a food business and managing products from preparation to sale.

I am highly idea-oriented and enjoy turning concepts into practical solutions. Through entrepreneurship, I have developed strong decision-making, problem-solving, customer service, sales, cost management, and leadership skills. I am comfortable working under pressure, managing limited resources, identifying opportunities, and adapting quickly to changing situations. I am seeking opportunities where I can combine my technical abilities with my entrepreneurial, sales, creative, and operational strengths.

SOFTWARE ENGINEERING PROJECTS

[alu-AirBnB_clone](#) – Python

Developed an object-oriented, console-based clone of the Airbnb platform, with a focus on backend data management.

[alu-shell](#) – Shell

Created Linux-based scripts for file management, user automation, and basic DevOps tasks.

[submission_reminder_app](#) – Shell

Developed a Bash-based alert application that reminds students of pending assignments, utilizing environment variables and text processing.

[alu-system_engineering-devops](#) – Shell

Worked on system engineering and DevOps tasks, focusing on network infrastructure and Linux utilities.

[alu-webstack](#) – Shell

Built backend configurations and scripts for web applications and network routing.

[DSA-HW01---Sparse-Matrix](#) – Python

Implemented matrix operations, including addition, subtraction, and multiplication, using sparse matrix optimization techniques.

[alu-interview](#) – Python

Solved algorithmic coding challenges as interview preparation modules.

[Playing-Around-with-APIs](#) – JavaScript

Developed API-based data fetching projects for interacting with external datasets.

[alu-web front end](#) – HTML, CSS

Created responsive websites as part of front-end development training.

[The-creator](#) – HTML

Designed simple web pages demonstrating static content deployment.

More Projects: alu-back-end, alu-scripting, alu-web-development, alu-zero_day, alu-higher_level_programming

Lines, Expense tracker App

LEADERSHIP & COMMUNITY

ALU E-Lab Volunteer

- Participated in a community assistance initiative supporting a single mother through monetary and grocery contributions.

CONTENT & DIGITAL ACTIVITIES

- Create career and technology-related content across TikTok and Instagram, sharing practical career tips and insights with an audience of 20K+ job seekers weekly.
